

# PROTEC

New software for the TEC line

- Enhanced operativeness
- Access to main controls both by mouse and keyboard
- Vocal Help "Text-To-Speech" available in the main languages
- Main instruments and equipment performance status displayed on the screen
- 3D graphics and Flash animations
- Detection of possible faults/hardware failures
- Real-time displaying of I/O signals on cards
- Safe and reliable coding for Bosch and Delphi injectors
- Indications are available on how to repair injectors, on the base of deliveries measured in tests previously carried out
- Reports on pump test, injector test, free test or DRV test can be transferred and read in Acrobat Reader.
